EDUCATION

University of Cincinnati **Cincinnati, OH**
Bachelor of Science, Computer Science

TECHNICAL PROFICIENCIES

Languages: JavaScript (ES6+), Python, TypeScript, SQL, Java, C++, Swift

Frontend Engineering: React, Three.js, Babylon.js, Next.js, Angular, Tailwind CSS, 3D asset pipelines, real-time UIs, design systems

Data & Storage: PostgreSQL, MongoDB, Firebase, Redis (caching), optimized queries, real-time sync

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, containerized deployments, CI/CD pipelines (GitHub Actions, Jenkins)

AI & ML Adjacent: LLM app integration, Generative AI UX, RAG workflows, model context protocols (MCP)

Mobile: Swift, SwiftUI, UIKit, SpriteKit, Xcode, React Native

Design Tools: Figma, Sketch, Adobe XD, Miro, FigJam, ProtoPie, SF Symbols, iOS Human Interface Guidelines

Certifications: Microsoft Azure AI Fundamentals, IBM Enterprise Design Thinking Practitioner

WORK EXPERIENCE

JOYDROP **San Francisco, CA**
Founding Product Engineer Sep 2025 – Present

- Delivered 0→1 build as founding engineer, owning the full stack end-to-end and shipping the product across web and iOS
- Built the Communities feature end-to-end, enabling users to create public/private groups, send invites, and self-manage join requests
- Shipped push notifications (Expo + NestJS) across 8+ trigger types and released the build solo via EAS/CI-CD to TestFlight
- Fixed 4+ native iOS build & toolchain blockers (Xcode signing, CocoaPods, compiler bugs), unblocking real-device QA and releases
- Boosted app performance ~30% while owning production triage and UI/UX execution from Figma to shipped code

Bright Mind Enrichment **San Francisco, CA**
UI/UX Web Developer Sep 2024 – Jul 2025

- Developed and maintained donation pages, improving usability and secure payment flows, boosting conversions by 20%
- Optimized site responsiveness and load times by 30% by implementing optimized React components and REST API integrations
- Accelerated backend performance, cutting API response times by 35% and lowering bounce rates by 20% with streamlined logic
- Delivered high-performance, accessible features end-to-end, boosting site traffic and engagement by 25%

TOYOTA **Georgetown, KY**
Full Stack Developer – Production Control May 2023 – Aug 2023

- Reduced manual errors by 20% by designing and deploying SQL pipelines for Supplier Change Requests
- Improved process scalability and collaboration by 30% by automating workflows with MS Azure and Kaizen methods
- Cut manual reporting efforts by 40% by building real-time analytics dashboards with Power BI and integrating CI/CD pipelines
- Improved data retrieval efficiency by 42% by automating supplier change request data infrastructure across 5+ teams

BECO Ventures **Singapore**
UI Process Engineer Sep 2022 – Dec 2022

- Enabled real-time monitoring of 10K+ greenhouse sensor readings by developing a cloud-based data processing pipeline
- Increased user efficiency by 40% by building interactive dashboards with React, Python, SQL, and MongoDB
- Streamlined reporting, cutting generation time by 30% and improving accessibility by 55% through real-time processing systems
- Improved product reliability and adoption by optimizing AWS infrastructure for 99.9% uptime and refining user flows

P&G – UC Simulation Center **Cincinnati, OH**
Data Analyst Jan 2022 – Apr 2022

- Designed automated analytics with Excel VBA + REST APIs, reducing processing time by 40% for global warehouse operations
- Produced Power BI dashboards that improved decision-making speed by 25% across 3+ time zones
- Validated data accuracy and improved reliability by integrating PyTest and automated testing pipelines
- Facilitated multi-time zone collaboration by designing a shared analytics system, enabling consistent data entry worldwide

PROJECTS

LAYER – iOS AI Skincare Assistant [SwiftUI, SwiftData, Vision, Foundation Models, SpeechAnalyzer] Oct 2026 – Present

- Engineered on-device document extraction turning photographed ingredient labels into structured data via Vision OCR & LLM parsing
- Shipped a tool-calling AI routine assistant, voice check-ins, and WidgetKit widgets, with rule-based fallbacks for non-AI devices

UTTER – Voice Capture for WatchOS & iOS [Swift, SwiftUI, WatchConnectivity, AVFoundation, Speech] Mar 2026 – June 2026

- Crafted full-stack watchOS/iOS voice capture app with on-device ML transcription and keyword-based auto-categorization
- Refined real-time visualization and seamless watch-to-phone audio transfer using AVFoundation & WatchConnectivity

ZOOMIES – iOS Runner Game [Swift, SpriteKit, Xcode] Sep 2025 – Dec 2025

- Built and optimized a Swift-based SpriteKit game with responsive physics, smooth animations, and low-latency performance on iOS
- Developed UI components in Swift and UIKit aligned with Apple's Human Interface Guidelines, improving usability & overall playability
